

HR System Implementation Roadmap

MediConsult, Dr. Nasser Rasmy

Company Size (system users): ~150 Employees

Project Duration: 4 Months (16 Weeks)

Objective: Deliver a production-ready, legally compliant HR system with measurable value, including an initial production go-live within the first two weeks.

Guiding Principles

- Modular and phased delivery
- Minimum Viable HR (MVHR) approach
- Business value before complexity
- Automation-first mindset
- Compliance with Egyptian Labor Law

Extended HR Capabilities

The proposed HR system goes beyond traditional HR management by introducing full employee–HR automation, biometric attendance integration, and strict compliance with Egyptian Labor Law. The system is designed to reduce manual HR workload, increase transparency, and protect the organization legally and operationally, and market it.

Employee–HR Self-Service Automation

- Digital request of experience certificates, employment letters, and salary certificates
- Automated approval workflows
- Auto-generation of official PDF documents with company branding
- Full request tracking and audit trail

Business Value:

- Reduced HR administrative workload
- Faster service delivery to employees
- Standardized and auditable HR documents

Biometric Attendance Integration

- Integration with fingerprint and face-recognition machines
- Real-time attendance synchronization
- Shift validation and overtime calculation
- Attendance anomaly detection

Business Value:

- Prevents attendance manipulation
- Ensures payroll accuracy
- Provides legally reliable attendance records

Egyptian Labor Law Compliance

- Enforcement of working hour limits and overtime rules
- Leave types aligned with labor law (annual, casual, sick)
- Contract management and probation period tracking
- Disciplinary actions and warning letters
- Contract expiry and legal risk alerts

Business Value:

- Legal protection for the company
- Reduced labor disputes
- Readiness for labor inspections

Digital Employee File

- Centralized digital employee records
- Secure storage of contracts, IDs, insurance documents, and evaluations
- Role-based access control

Business Value:

- Faster audits and document retrieval
- Improved data security and governance

HR Case & Ticketing System

- Structured HR requests and complaints
- SLA-based tracking and escalation
- Performance measurement of HR services

Business Value:

- Increased transparency
- Improved employee satisfaction

Smart Alerts & Notifications

- Contract expiration alerts
- Excess overtime warnings
- Attendance violations
- Legal and compliance risk notifications

Business Value:

- Proactive management
- Risk prevention before escalation

Implementation Roadmap (4 Months)

Phase 0 – Rapid Preparation (Week 1)

- Define scope and governance
- Prepare organizational structure
- Define roles and access rights
- Identify core KPIs

Phase 1 – First Production Go-Live (Week 2)

- Employee Master Data
- Organizational Structure
- Employee Self-Service (Certificates & Requests)

Outcome: First live production usage within two weeks.

Phase 2 – Operational Control (Weeks 3–6)

- Attendance and leave management
- Biometric device integration
- Approval workflows

Phase 3 – Financial & Legal Control (Weeks 7–10)

- Payroll integration
- Labor law enforcement rules
- Performance KPIs

Phase 4 – Executive Intelligence (Weeks 11–14)

- Executive dashboards
- Attrition risk indicators
- Department benchmarks

Phase 5 – Optimization & Scale (Weeks 15–16)

- UX optimization
- Data accuracy review
